Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's amendment (cancellation of claim 1 and addition of new claims 2-13) is acknowledged in paper no. 4. and the substitute specification filed 03/10/03 has not been entered because it does not conform to 37 CFR 1.125(b) because: a substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a **marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.**

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 2, 3, 6, 7, 8, 9, 12, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Piazza (US Patent No. 3,578,801).

Piazza discloses a practice bat comprising:

- A hollow outer tube (11);

Art Unit: 3711

- A handle (12) having a hollow inner end abutting an inner end of said hollow outer tube and into which said hollow outer tube inserts (refer to Fig. 1);
- A solid plug (18);
- An end cap (referring to Fig. 1. the top area of item 11 near item 18 is considered as an end cap);
- A hollow sliding inner tube (17' and refer to Fig. 4);
- Wherein the outer hollow tube and the end cap are made of plastic (column 1, line 55); and
- Wherein the sliding inner tube is made of plastic (column 1, line states that the sliding element is plastic).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 5, 10, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Piazza in view of Tyner (US Patent No. 6,254,498).

Piazza discloses a practice bat as recited above but fails to include a handle that is made of foam rubber and a solid plug that is made of plastic. However, with respect to the handle, Tyner discloses a handle that is made of a foam rubber (column 4, lines 20-21). Thus, it would have been obvious to one of ordinary skill in the art at the time the

Art Unit: 3711

invention was made to provide a handle that is made of a foam rubber as taught by Tyner in the Piazza device in order to provide a bat that absorbs shock without discomfort to the batter as stated on column 4, lines 25-26 of the Tyner's invention. With respect to the plug to be made of plastic, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a plastic plug, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3711

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
